

# Adaptive Multimedia Retrieval

Marcin Detyniecki<sup>1</sup>, Joemon Jose<sup>2</sup> and Andreas Nürnberger<sup>3</sup>

<sup>1</sup>University of Paris, <sup>2</sup>University of Glasgow, <sup>3</sup>University of Magdeburg

- Interaction with today's large amount of multimedia data is extremely hard.
- An idea is to bridge the semantic gap using “adaptivity”.
- What is “adaptivity” in multimedia retrieval context?
  - Personalization & Feedback.
  - Intelligent Interfaces & Visualization.
  - New types of Query & Interaction.
- Where are people putting nowadays this “adaptivity”? → state of the art.
- How can more “adaptivity” help? → challenges
